Adjustment

1. Handle/Cap Removal

Foot Pedal: Unscrew screw cap (F2) from assembly. Remove F3 and F4 (and F5 if installed).

Push Button: Unscrew P3 from cap. Remove P4.

Wrist Action: Remove W2. Various handle assemblies are available. Majority of handle assemblies contain handle, screw, and index tab.

2. Timing Adjustment

1/8 turn increments
clockwise for longer
flow time

1/8 turn increments
counter-clockwise for
shorter flow time

Refer to exploded view for metering screw location.

Depress stem (with P5 insulator installed) fully to verify timing and make adjustments if necessary after valve has closed.

3. Reinstall handle assembly

Cartridge Replacement:

1. Turn off water supply.
2. Perform step 1 in adjustment section.
3. Unscrew F6 (foot pedal), P8 (push button), or W4 (wrist action) from faucet body.
4. Unscrew C1 from F6, P8, or W4.
Note: Cartridge may have unscrewed from bonnet during bonnet removal.
5. Discard old C1 and its attached seals.
6. Screw new C1 into bonnet (F6, P8, or W4).
7. Verify that external seals are intact (C3, C4, C5). It is helpful to push C3 into bonnet until it bottoms out. This will insure proper sealing with the faucet body.
8. Screw assembly securely (30 lbs minimum) into faucet body.
9. Turn on water supply and check for leaks.
10. Reinstall handle assembly.
Caution: If faucet has separate hot and cold controls, make certain that hot water shuts off before cold to avoid scalding.
Wrist Action Note: Install wrist action handles in an orientation that allows 1/4 turn (full activation of metering cartridge). Whenever possible, install handles to prevent valves from being intentionally stuck in open position when handle is rotated beyond intended 90° (1/4 turn) activation.
