

European and Australian Wall-Mount Halo™ Eyewash or Eye/Face Wash

S19224 Series

- Halo™ Delivers the Most Effective Eye/Face Washdown Coverage and Spray Pattern
- Exceeds Australia/New Zealand AS-4775 & AS/NZS 4020
- Industry's Only Self-Draining Design – The Aquaduct™
- Separate Supply and Waste Pipes – Meets CEN and Plumbing Requirements
- Ergonomic Hand Activation Eyewash Paddle – Easy to Reach from Any Direction
- Barrier Free
- Fully-Assembled and Factory-Tested Eyewash or Eye/Face Wash with Hinged Dust Covers
- Yellow Transparent Plastic and Stainless Steel Bowl Covers Available
- Universal Identification Sign and Inspection Tag Included
- Certified by DVGW to EN 15154-2
- Certified by IAPMO OCEANA to AS4775 and AS/NZS 4020
- Halo is Covered by One or More of the Following Patents: D662,220; D662,219; D685,920. Other Patents Pending.

Specifications

Standard Eyewash or Eye/Face Wash Units save space and fit easily into any work environment. Halo eyewash or eye/face wash, operated by an ergonomic, highly visible push handle, provides effective wash down coverage and spray pattern. Integral strainer reduces debris in the water and also prevents clogging.

This plumbing fixture is not intended to dispense water for human consumption through drinking or for preparation of food or beverages.

Pipe and Fittings

Piping to ½" NPT (BSPP) water supply inlet on unit. Piping to 1¼" NPT drain outlet for eyewash.

1¼" piping assembly manufactured of one of the following materials:

- Type 304 corrosion resistant stainless steel

Ball Valve

½" stay-open eye and eye/face wash valve manufactured of the following materials:

- Type 316 stainless steel

Eyewash

The Halo eyewash system offers a high performance rinsing platform that provides rapid relief to an individual's eyes that have been injured by chemicals or particulate. The eyewash includes an integral 5.1 GPM (19.2 L) flow control, providing water at a safe velocity while maintaining its effectiveness (exceeds minimum water flow of 0.4 GPM (1.5 L) at 30 PSI (2.0 bar)). Eyewash is protected by flip open dust covers that open when product is activated or by a full bowl dust cover that activates the unit when it is opened. Safe, steady water flow under varying water supply conditions from 30–90 PSI (2.0–6.1 bar) is assured by integral flow control in the sprayhead assembly.

Eye/Face Wash

The Halo eye/face wash system offers a high performance rinsing platform that provides rapid relief to an individual's eyes and face that have been injured by chemicals or particulate. This system provides the most complete face wash available in the market. The eye/face wash includes an integral 5.1 GPM (19.2 L) flow control, providing water at a safe velocity while maintaining its effectiveness (exceeds minimum water flow of 3.0 GPM (11.4 L) at 30 PSI (2.0 bar)). Eye/face wash is protected by flip open dust covers that open when product is activated or by a full bowl dust cover that activates the unit when it is opened. Safe, steady water flow under varying water supply conditions from 30–90 PSI (2.0–6.1 bar) is assured by integral flow control in the sprayhead assembly. Sprayheads are made from an impact resistant ABS plastic or from durable 304 stainless steel with electro-polished finish.

eyewash

Bowl

Bowl is constructed of yellow impact-resistant plastic or Type 304 corrosion-resistant stainless steel. Optional dust cover is constructed of transparent yellow impact-resistant plastic or Type 304 corrosion-resistant stainless steel.

Activation

Type 304 stainless steel push handle with optional type 304 stainless steel foot pedal.

Wall Bracket

Heavy-gauge sand cast aluminum protected with BradTest safety yellow coating. Includes three clearance holes for mounting bracket onto wall (mounting hardware not included).

Waste

1¼" drain fitting and tailpiece furnished.

Drench hose, backflow prevention and mixing valves are not certified to Australia AS4775 or European EN 15154-2.

Tepid Water Options

Navigator S19-2000 EFX8
Emergency Thermostatic Mixing Valve

Keltech® CLE-Series
Tankless Water Heater

NAVIGATOR

Satisfies ANSI/ISEA Z358.1 tepid water requirements.

All dimensions assume standard thread engagement. Variations in manufacturing allow for +/- 1/16" (3mm) per threaded joint. To find the tolerance of a dimension, add the number of thread joints across the length of the dimension and multiply it by 1/16" (3mm).
