

AutoFresh™ Gel Dispenser with Visual Indicators (LEDs)

400112

The dispenser that started it all and revolutionized the odor control industry.

An economical solution to restroom needs incorporating our patented Smart Chip "wafting" fan controller for optimum performance of TC Gel Air Neutralizers.

- Hi-tech dispenser creates a "We Care" image.
- Innovative and long-lasting components
- 30 day refill life.
- Visual indicators signal "change me."
- One dispenser controls odors in areas up to 3000 sq.ft.

Wall/Credenza Cabinet Design

- Solid state construction ensures quiet, long lasting unit life.
- Battery location beneath the motor protects critical components from possible battery leakage.
- Operates on two "D" cell batteries (*not included*) - *alkaline recommended*.
- Tamper proof cover release feature discourages pilferage.
- Detachable base allows unit to stand upright on credenza, desk table, counter-top, mantel, etc. Unit also mounts easily with double-sided tape or screws.

30 Day LED Monitor

- A special red timer flashes when 30 days have elapsed.
- Allows maintenance personnel to know a new gel cup should be inserted... eliminates all guess work!
- Light provides for proper scheduling of fragrance gel which means efficient and effective odor control (unit incorporates a 30 day reset button to insure proper replacement of each and every gel cup).

Light Sensor

- Activates the motor to turn "off" when room lights are off, returning to "on" when the lights are turned on.
- Saves battery and gel life.

Case Pack: 6
Case Weight: 6 lbs.
Case Cube: .71

Battery On/Off LED Mode

- A yellow light located on the front of the unit indicates that the fan cabinet is functioning.
- Light goes "off" when the battery charge is too low to operate the unit effectively.

On/Off/Auto Selector Switch

- In the "on" position the fan operates on a 15 minutes *on* and 7½ minutes *off* continuous cycle.
- In the "off" position the fan will not run.
- In the "auto" position the fan operates on a 15 minutes *on* and 7½ minutes *off* continuous cycle, but is deactivated when not exposed to light.
- The "on-off cycle" increases battery life.
- Studies show that an on-off cycle, which creates a wafting effect, maximizes fragrance impact.
