

Recommended For Heavy Soil and Grease On Synthetic Fibers

Certified's **Synthetic** Shampoo is an alkaline shampoo specially formulated to remove heavy grease and soil on today's synthetic fibers. **Synthetic** Shampoo will give you outstanding results where others would fail. **Synthetic** Shampoo cleans extra dirty commercial, synthetic carpet faster and easier. Not recommended for use on wool and cotton fibers.

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

CARPET CLEANING:

Prepare carpet for shampooing in normal manner with vacuum or Certified Pile Brush.

1. Dilute 10 oz. (300 mL) of **Synthetic Shampoo** with 1 gallon (3.78 L) of warm water (140°-150°F).
2. For best results, fast drying and efficiency, shampoo carpet with 3-5 quarts (liters) of **Synthetic Shampoo** stock solution per 100 square feet.
3. Use Hand Nap Brush, vacuum or Certified Pile Brush to finish carpet after cleaning.

Use furniture protectors under legs if furniture must be replaced before carpet is dry.

4. Vacuum thoroughly when dry.

UPHOLSTERY CLEANING: Vacuum furniture thoroughly.

1. Dilute 10 oz. (296 mL) of **Synthetic Shampoo** with 1 gallon (3.78 L) of room temperature water.
2. Clean in normal manner with brush or sponge.
3. Wipe any excess foam from legs or other unupholstered areas.
4. Finish all nap type coverings with soft brush combing in one direction.
