

Encapsulating Carpet Spotter is an ideal, all-purpose spotter that breaks down a wide range of spots and stains. Used in the same manner as a traditional spotter, but does not contribute to re-appearing spots. Remove the spot one time and forget it!

Traditional detergents leave behind sticky residues that lead to rapid resoiling. But the **Structured By Nature** encapsulating detergent dries into a hard crystalline material that fractures off the carpet fiber during the dry vacuuming process. Therefore an important benefit of encapsulation is that any residue left behind is of a non-sticky nature, and consequently does not result in rapid resoiling.

Why Encapsulation?

- Leaves no harmful residue
- Prevents soil wicking
- No sticky residue
- No rinsing required
- Eliminates rapid re-soiling
- Carpets stay cleaner longer

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

- 1. Wet with plain water.
- 2. Liberally apply Structured By Nature™ Spotter to affected area
- 3. Work spotter into carpet pile and blot with a clean white towel
- **4.** Rinse with clean water, and blot with a clean white towel.
- **5.** Repeat if necessary.
- **6.** Vacuum when completely dry.

NOTE: Freezing will not affect cleaning power. Thaw, shake well and use.
