

Controls foam residue left in carpets from previous cleaning

Certified's **Granular Defoamer** is an economical way to control foam build-up in carpets. Use only when and where necessary. Highly concentrated granules prevent and eliminate foam. May be used with all portable or truck mounted hot water extraction equipment. Keeps nozzle, hose and extraction tank free of foam build-up. Eliminates foam before it gets to the recovery tank, therefore extending portable unit vacuum motor life. Granular Defoamer is easy to apply.

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

TO PREPARE STOCK SOLUTION:

1. Sprinkle Certified **Granular Defoamer** lightly over area to be cleaned. Amount used will vary and depends upon residue in fabric.
2. Proceed with normal cleaning.
