

A Concentrated Natural Wick Deodorizer

Odor Blocks are useful in controlling odors in:

- Automobiles
- Duct system registers
- Furnace plenums
- Intakes of carpet dryers
- Small rooms and closets
- Fires Damage
- Smoke odors
- Cooking

ODOR BLOCKS™ is a simple and convenient natural wick odor counteractant. **ODOR BLOCKS™** will quickly suppress odors in virtually any location. This deodorizer will dispense more rapidly as temperature rises or when air flow increases across the surface of the block. The **ODOR BLOCKS™** media holds more than three times its weight in active ingredients for long lasting deodorization.

ODOR BLOCKS™ is a natural wick. Duration and intensity of deodorization is controlled by varying **ODOR BLOCK'S** exposure to the air. Open the package and place in furnace plenum, duct system register, on intake of carpet dryer, etc. **ODOR BLOCKS™** is a superb closet or car freshener.

ODOR BLOCKS™ are useful in controlling odors in:

Automobiles	Duct system registers
Furnace plenums	Intakes of carpet dryers
Small rooms and closets	Fires Damage
Smoke odors	Cooking

Available in a wide variety of pleasant scents, the natural wicking block starts dispensing when the sealed package is opened.

Odor Control & Facility Care Solutions

ODOR BLOCK™

Natural Wick Deodorizer

Appearance: Woody, fibrous block

Dimensions: 2¾ W × 3¾ H × ½ D

Weight: Approx. 1 oz. (28 gm) per block

Flash point: 134° F

Fragrance

Original OR-ODORBLOCK

Cherry CH-ODORBLOCK

Citrus CT-ODORBLOCK

INSTRUCTIONS:

Remove the Odor Block from the wrapper and strategically place the Odor Block in the area to be cleaned or treated.

To control the amount of deodorant emitted by the block and also to extend the life of the block, try these tips:

- Snip off a corner of the package. Later, when the scent is reduced, cut off a larger portion of the package. Wrap a rubber band around the package to make sure the block doesn't fall out.
- Poke a few holes in the package to control the release of scent. When the scent is reduced, poke a few more holes in the package.

Airflow and temperature also influences the amount of scent released. If the deodorizing scent becomes too strong, reposition the block in an area of lower air flow or lower temperature or remove the block.

CAUTIONS: Avoid varnished, painted or plastic surfaces. KEEP OUT OF THE REACH OF CHILDREN! AVOID OPEN FLAME!

NOTE: Also be sure that pets and children will not have access to the Odor Block. Avoid areas where there could be open flames or sources of ignition. Avoid placing the block on surfaces that might be damaged or discolored by oils. These surfaces include painted, varnished and plastic surfaces.

Because the deodorizer has oily components, be sure to use the block only in areas where contact with an oil will not cause damage. The oil might soften or discolor certain paints.
