

Complete And Easy Removal Of Organic Stains, Soil And Related Odors.

Powder Enzyme Pre-Spray is a special formulation containing enzymes and a pleasing fragrance. It may be used as a pre-spray for carpet cleaning or as a wet cleaning spray for upholstery cleaning. Complete and thorough removal of organic odors and related soils using a bio-enzymatic action. It contains corrosion inhibitors and other ingredients to improve performance in hard water. It is safe, environmentally responsible and biodegradable.

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

TO PREPARE STOCK SOLUTIONS:

Make up only enough solution for use the same day. Solution may still be used after 24 hours, but enzyme activity is reduced.

Best results are obtained when Enzyme powder is dissolved in warm - **NOT HOT** water. Best temperature range is 100° to 110°F (38° - 43° C).

PRE-SPRAY FOR CARPET:

For heavy soil, mix 3 oz. (85 g) of Enzyme powder with 1 gallon (3.79 L) of WARM water.

For moderate soil, mix 2 ounces (57 g) with 1 gallon (3.79 L) of WARM water.

For oily soils, Certified Traffic Spotter may be added without interfering with enzyme action. May be used to treat entire carpeted area and then rinsed with clean water extraction.

WET CLEANING FOR UPHOLSTERY CLEANING:

Mix 1 1/2 oz. (43 g) of Enzyme powder with 1 gallon (3.79 L) of WARM water. Spray lightly over soiled area and sponge, towel or brush in.
